Dashboard Connector

A photograph of four business professionals in a meeting. A man in a dark suit and striped tie is smiling and pointing at a laptop. A woman with blonde hair is on the phone. Another man is looking at the laptop. The background is a blurred office setting.

**The smart way to create one overview by
connecting all your applications**

Ginger's Dashboard connector is a battle-tested web service that, as its name implies, allows you to create one single overview of all the services provided by the Ginger Services Platform, by streaming all relevant events to an endpoint of your choosing.

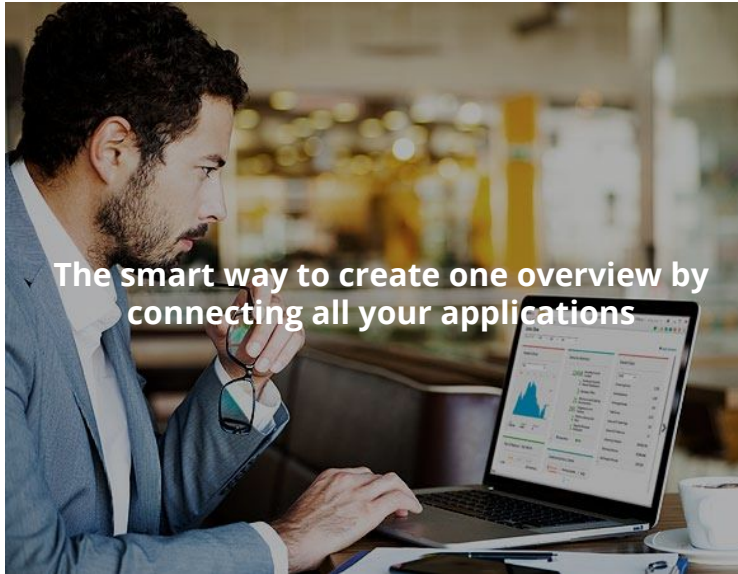

The single RESTful API interface provides all the controls you need and none you don't, and extensive reporting capabilities ensure you're always in-the-know of what has happened.

Product benefits

- Hassle-free integration: Minimal technical complexity
- Simple interface: Controllable through a single RESTful API
- Look & feel: We provide the data, you provide the UI
- Flexible: Use the real-time event stream, pull the latest information using the API, or both

Great for

- Uniformity in status reporting
- Daily monitoring
- Clean comparison between departments

ING Wholesale Banking uses Ginger's Dashboard Connector to connect several applications (containing merchant data) and displaying them in one dashboard.

"Ginger's Dashboard Connector allowed us to unlock and unravel all available data. It gave us great insights. We can now focus on delivering great experiences for our customers."

- Angelique from ING

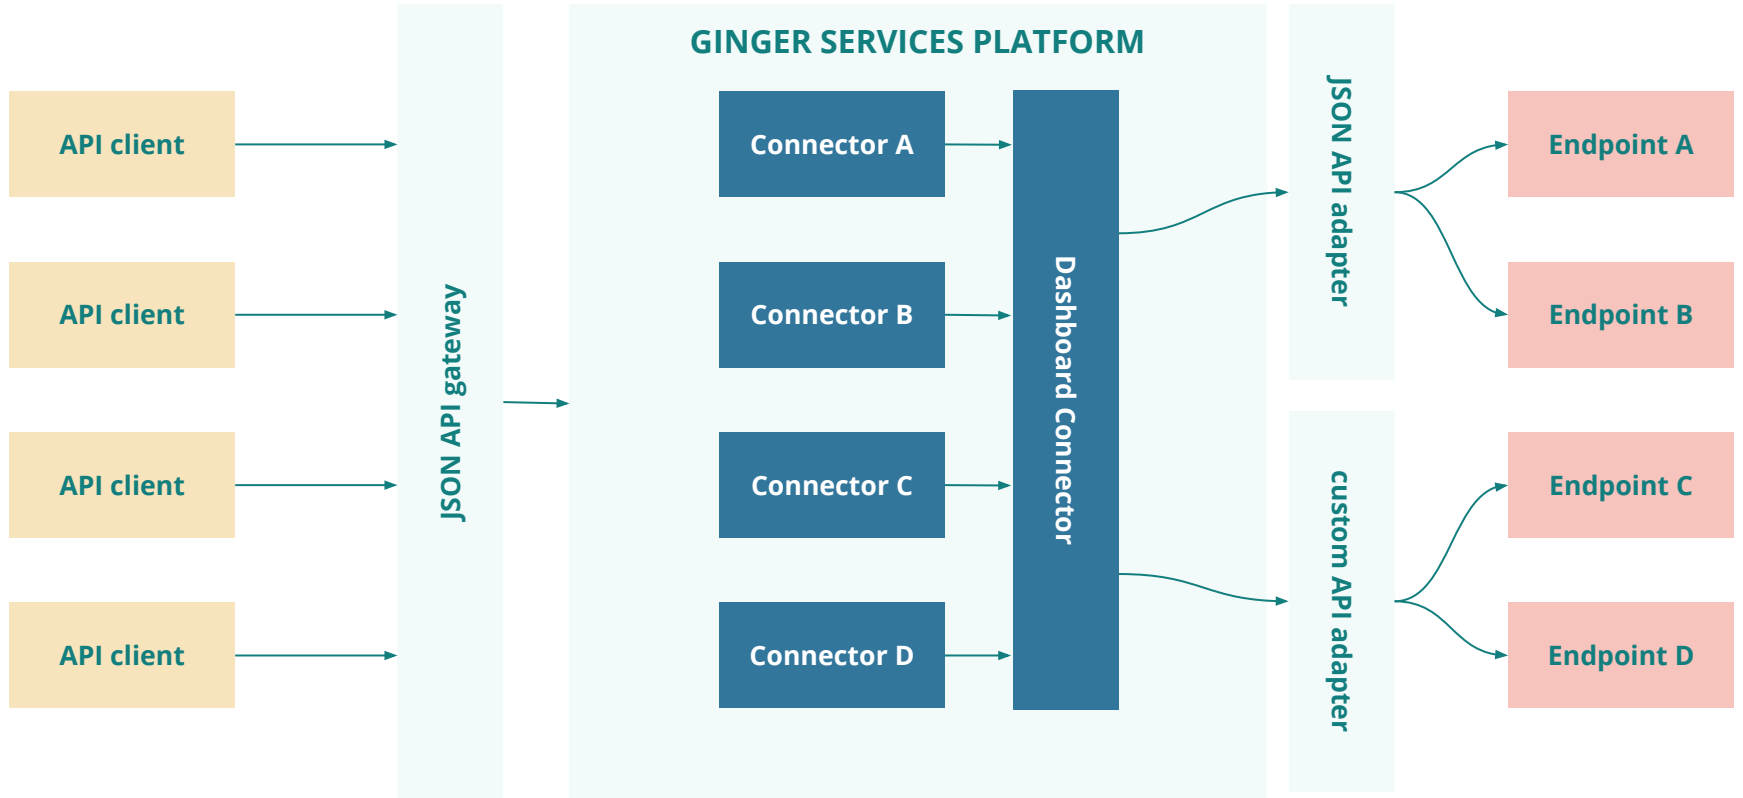

FEATURES

- Dashboard content can be altered in any way you like
- Extensive reporting with useful presets and formats
- Dashboard or reporting; use ours or create one yourself
- Fully compatible with other GSP services

The Ginger Dashboard connector is part of the **Ginger Services Platform**. The system-based design of the platform allows all GSP Services to work together to create an invaluable toolkit for developers of applications in payment & financial markets.
